

Ha habido incidencias con el pipeline Jenkins de la práctica 5. Instalamos el docker en el Jenkins a través de la primera opción con el Shell de Jenkins. También configuramos los plugins necesarios (JDK, Maven... y Credentials).

No se activa el “docker daemon” aun habiendo ejecutado el docker de Jenkins con la opción “—privileged”:

A terminal window titled 'carles@carles-VirtualBox: ~/proyectos/wiki4/wiki4'. The user runs 'jenkins2' and then 'sudo docker ps -a'. The output shows a single container named 'jenkins66' with image 'jenkins/jenkins:lts', running '/usr/bin/tini -- /u...' command, and ports 8080 and 50000 exposed. The container is 'Up 7 minutes'.

```
jenkins2
carles@carles-VirtualBox:~/proyectos/wiki4/wiki4$ sudo docker ps -a
CONTAINER ID   IMAGE                  COMMAND                  CREATED        STATUS        PORTS
31ccf94f00b1   jenkins/jenkins:lts   "/usr/bin/tini -- /u..." 7 minutes ago   Up 7 minutes   0.0.0.0:8080->8080/tcp, :::8080->8080/tcp, 0.0.0.0:50000->50000/tcp, :::50000->50000/tcp
carles@carles-VirtualBox:~/proyectos/wiki4/wiki4$
```
